## Meeting Faculty

---

**Dr Greg Janes**

*Evaluation and treatment of hip abductor tendon pathology*

**Dr Ross Radic**

*Management and preliminary findings on posterolateral corner reconstruction*

**Dr Peter D'Alessandro**

*Graft selection in the context of knee single- and multi-ligament reconstruction*

---

Despite recent advancements, ligament and tendon reconstruction in the knee and hip remains a complex challenge in modern orthopaedics. Led by our expert faculty, we aim to foster an interactive discussion among colleagues around different approaches to these complex issues, adding to the conversation on treatment and management.
