Auckland, New Zealand

#### Course Description:

Join our expert faculty in a live webinar as they discuss decision making including different graft options, to optimize outcomes after ACL reconstruction. Immerse yourself in case presentations and interactive discussion with experts led by Dr Peter D'Alessandro.

At the end of this webinar, participants will be able to:

- + Identify the various graft options for ACL Reconstruction including graft preparation and surgical techniques
- + Describe the benefits and risks for each graft option
- + Understand the key decision making considerations including patient risk factors, associated injuries and lifestyle goals for different grafts

#### Participant Profile:

Sports Medicine knee surgeons or other Health Care Providers who are interested in expanding their knowledge on the treatment of ACL reconstruction.
