

+ Shoulder Instability and Reconstruction: Case Discussion Session and Journal Club

Friday 30th July 2021

Smith+Nephew

Medical Education

Course Description

The Shoulder Instability and Reconstruction: Case Discussion Session and Journal Club will focus on evidence-based discussion and peer-to-peer experience sharing, and will be interactive, allowing all participants to ask questions and add their experiences to the discussion. The Program consists of case reviews and Q&A sessions where attendees will develop knowledge & techniques from instability treatment algorithm to rotator cuff healing enhancement strategies.

Participant Profile

This course is designed for accredited registrars and fellows interested in expanding their knowledge in evidence, techniques, technology and outcomes in the areas of shoulder arthroscopy, rotator cuff and instability repair.

Learning Objectives

By attending this event, participants will be able to:

- + Recognize more aspects of shoulder repair, through discussion and evidence
- + Provide evidence-based guides for diagnosing and managing rotator cuff and instability repair
- + Identify the suitable treatment options and potential technical challenges

Invited Faculty

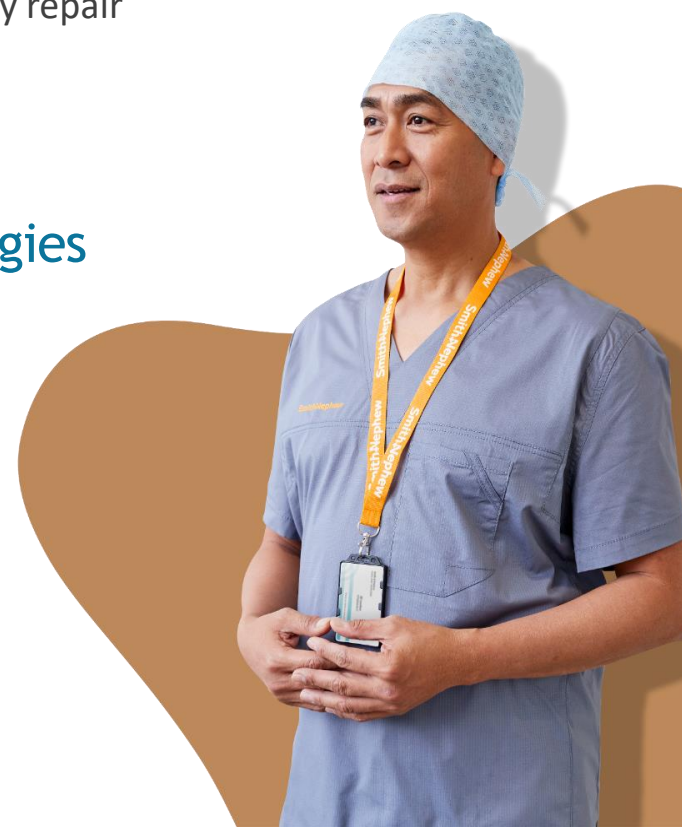

Dr Peter D'Alessandro
Orthopaedic surgeon

Dr Li-On Lam
Orthopaedic surgeon
